Dear Dinesh,

For your perusal, please find attached AIR file documentation that Amadeus sent us

I hope you are well.

- Please find attached the User Guide around the A.I.R. Files Data Transfer process and how this is generally configured between Amadeus and the party needing to retrieve the data.
- Below is what we have managed to identify as a method that can be used for the Data retrieval via the Web Services Application, without the full services of Search and Book being applied.

For the arrangement, we would need to have a CAU (Customer Application User) agreement in place. This will allow for the customer's (Arcadia) Office to be linked to your Web Service Application Services that will be opened. All services will be made available for you in your WDSL for CRM purpose only. Example of services below, where most likely only the **PNR_Retrieve** is what you will apply for the Data retrieval.

| | |
|--|------|
| Air_FlightInfo | 7.1 |
| Command_Cryptic | 7.3 |
| — Interface: DistributionProfileAccess | 12.2 |
| Profile_CreateProfile | 12.2 |
