01-Aug-2023	Dinesh Maulloo	Initial Assignment
25-Aug-2023	Dinesh Maulloo	All Airfile instructions to push to Invoices

High-Level Project Overview

- Current System
 - o All requests (individuals or corporate) handled by agents through email.
 - Amadeus can generate Quotes with flight details.
 - When tickets are issued, an airfile is generated.
 - E-Travel Invoicing software captures the airfile and agent can generate invoice with added services (hotels, insurance, etc)
 - Every day all sales/credit note transactions exported in E-Travel which will be imported in their Accounting system.
 - The travel agency only deal with cash transactions while the accounting team do all follow ups for invoice payments (corporates).
- Target System
 - Request (or Deals) managed in Zoho CRM (Nettobe)
 - CRM to capture airfiles and that info used to generate Invoices. (Helios)
 - CRM to provide interface to export transactions. (Helios)

01-Aug-23 - Assignment

 Mechanism to retrieve airfiles from WorkDrive and insert into Airfile module record

- a. Currently the airfiles come to folder: D:\PNR\AIR\AIR_SOURCE
- b. Once processed by E-Travel, they are moved to: D:\PNR\AIR\AIR_BACKUP
- c. A batch file is scheduled every 5 mins to mirror the AIR_BACKUP folder to the Workdrive folder: Y:\Amadeus
- d. Note: we can discuss if there is a more efficient way to do this
- e. CRM should know which file has already been processed.
- f. There should be a button to manually trigger the airfile processing
- g. Not all information from the Airfiles need to be retrieve; only info relevant to invoicing:
 - i. Name of passenger
 - ii. Reservation number
 - iii. Airline
 - iv. Flight routing
 - v. Dates of travel
 - vi. Class of booking
 - vii. Fare
 - viii. Taxes (Break down)
- h. Some fields may have to be populated in subforms (due to non-atomicity)

2. Link Airfiles to Deals

- a. We are going to define a field ('Booking Reference' or 'Reservation Number'
 - to be confirmed) which we will also be within the Deals (having been
 input by the agent). Through this, we will be able to automatically link the
 airfile records to the Deal
- 3. Generate Invoice
 - a. We will look into this once step 1 is complete.
 - b. Invoice examples are in the folders
 - c. There are existing products where we will only populate the description from the airfiles

S.NO	Product Name	Quantity	List Price (MUR)	Amount (MUR)	Discount (MUR)	Tax (MUR)	Total (MUR)
1	AIR TICKET	1	30,000.00	30,000.00	0.00	0.00	30,000.00
	NAME/FIRST MR ROUTING: MRU/CDG/MRU DEP: 29-AUG-23 AIRLINE Ticket Number						
2	AIR TICKET TAX	1	5,000.00	5,000.00	0.00	0.00	5,000.00
	Ticket Number						
3	SERVICE FEE	1	5,000.00	5,000.00	0.00	0.00	5,000.00
	Ticket Number						
4	HOTEL	1	15,000.00	15,000.00	0.00 🔞	0.00	15,000.00
	Hotel: Ritz Plaza Room Name: Terrace View Guest Name: Dinesh Maulloo Rooms: 1 Nights: 2			\sqrt{g}			

25-Aug-23 - Assignment

- 1. Requirements for retrieving new AIR files
 - a. Existing system is described above in step 1.a to c.
 - b. Any new AIR File should be retrieved and pushed to CRM once available on Workdrive. Depending on your polling method and logic in place, you may decide to put processed files in a subfolder.
 - c. We should be seeing any new file being pushed to CRM
- 2. Information to be retrieved from airfile:
 - a. Name of passenger: Single line
 - b. Reservation number: Single line
 - c. Ticket Number: Single Line (Header T)
 - d. Airline: Single Line
 - e. Flight routing: Subform (1 entry for each H line)
 - f. Flight description for Invoice field: (Multi line which will be mapped to Line Item description field:

ANBAZHAGAN/KUMARAVEL MR ROUTING : MRU/DXB/MAA/DXB/MAA

DEP 11-JUL-23

EMIRATES AIRLINE

176 9727402659

- g. Dates of travel (Date)
- h. Class of booking (Single Line)
- i. Fare (Currency)
- j. Taxes (Composite airfile field to be broken down in subform, tax name + amount)

- k. Tax Total (Currency)
- 3. Linking of Air file to Deals:
 - a. Please cater for a field (eg Reservation number) which will be entered on a
 Deal so that we can automatically link the Air files record to the Deal
 - b. There should be a button within the Deal, so that it will search any airfile with that field value and link it.
 - c. Special cases:
 - When there is a single booking for multiple passengers, each passenger has a separate airfile. Samples airfiles in the subfolder: Single Booking Multiple Passengers (AIR00617_10082023165218.AIR, AIR00618_10082023165218.AIR, AIR00619_10082023165218.AIR)
 - The client can decide to invoice each passenger separately or within single invoice. But all these airfiles should be linked to single deal.
- 4. Airfile Data to Invoice
 - a. Examples of existing invoices from e-travel are already in Sample folder:

- b. There should be a button within the deal which will pull info from linked airfiles to an invoice
- c. Existing products have already been created:

- i. Air Ticket, Air Ticket Tax, Service Fee
- d. Sample of new Invoice:

Invoiced Items							
S.NO	Product Name	Quantity	List Price (MUR)	Amount (MUR)	Discount (MUR)	Tax (MUR)	Total (MUR)
1	AIR TICKET NAME/FIRST MR ROUTING: MRU/CDG /MRU DEP: 31-JUL-23 AIRLINE Ticket Number	1	100,000.00	100,000.00	0.00	0.00	100,000.00
2	AIR TICKET TAX Ticket Number	1	20,000.00	20,000.00	0.00	0.00	20,000.00
3	SERVICE FEE Ticket Number	1	10,000.00	10,000.00	0.00	1,500.00	11,500.00
4	HOTEL Hotel: Room Name: Guest Name:	1	0.00	0.00	0.00	0.00	0.00

- e. The airfile fields should be populated in their respective item descriptions as well as their amounts
- f. There should be an option to push to single invoice or separate invoices.
